Anacondas Predators In The Wild

As an added bonus, anacondas—like crocodiles—also have eyes and nostrils designed to poke above a river's surface.. No wonder the stealthy, semi-aquatic predators are occasionally called ...

11 Fun Facts About Anacondas | Mental Floss

As intimidating as they are, you're not likely to see an anaconda soon, except maybe in the zoo. Anacondas live only in South America, where they hang out in rainforests near the Amazon River. They can't move very fast on land, but they're expert swimmers.

Anaconda Fun Fact for Kids

The giant otter or giant river otter (*Pteronura brasiliensis*) is a South American carnivorous mammal. It is the longest member of the Mustelidae, or weasel family, a globally successful group of predators, reaching up to 1.7 metres (5.6 ft). Atypical of mustelids, the giant otter is a social species, with family groups typically supporting three to eight members.
