Business Cycle Macroeconomics

The business cycle, also known as the economic cycle or trade cycle, is the downward and upward movement of gross domestic product (GDP) around its long-term growth trend. The length of a business cycle is the period of time containing a single boom and contraction in sequence. These fluctuations typically involve shifts over time between periods of relatively rapid economic growth (expansions ...

The NBER does not define a recession in terms of two consecutive quarters of decline in real GDP. Rather, a recession is a significant decline in economic activity spread across the economy, lasting more than a few months, normally visible in real GDP, real income, employment, industrial production, and wholesale-retail sales.

US Business Cycle Expansions and Contractions

Macroeconomics (from the Greek prefix makro-meaning "large" + economics) is a branch of economics dealing with the performance, structure, behavior, and decision-making of an economy as a whole. This includes regional, national, and global economies. Macroeconomists study aggregated indicators such as GDP, unemployment rates, national income, price indices, and the interrelations among the ...

Recurring, fairly predictable, general pattern of periodic fluctuations (as measured by gross national product) in national economies. Left to themselves, all market economies repeatedly (typically every five years) move through four stages of (1) expansion, (2) peak, (3) recession, and (4) recovery. Despite numerous attempts to explain causes of economic cycles, no theory is universally ...
