

Coastal Fishes Of The Pacific Northwest

Coastal Fishes Of The Pacific

Coastal fish are found in the waters above the continental shelves that extend from the continental shorelines, and around the coral reefs that surround volcanic islands. The total world shoreline extends for 356,000 km (221,000 mi) and the continental shelves occupy a total area of 24.286 million km² (9 376 million sq mi). This is about 4.8% of the world's total area of 510.072 million km².

Environmentalists have long denounced plastic as a long-lasting pollutant that does not fully break down, in other terms, not biodegradable. In 2004, a study lead by Dr Richard Thompson at the University of Plymouth, UK, reported finding great amount of plastic particles on beaches and waters in Europe, the Americas, Australia, Africa and Antarctica.

Oil and gas production platforms span the entire water column from the seafloor through the sea surface like an island. However, distinct from an island, the openness of a petroleum structure allows for water circulation, oceanic energy dissipation, and easy mobility for fishes inside the structure.

The Matetic EQ 'Coastal' Sauvignon Blanc is a very pale yellow color, with green hues. The nose is complex and delicate, with aromas of mature tropical fruit such as mango and lychee, with apple custard (cherimoya), papaya and lime peel, mixed in with herbal notes and green chili. The mouth is concentrated, fruity and fresh, dominated by a persistent mineral overtone.
