Harm reduction approaches to alcohol problems have endured a controversial history in both the research literature and the popular media. Although several studies have demonstrated that controlled drinking is possible and that moderation-based treatments may be preferred over abstinence-only approaches, the public and institutional views of alcohol treatment still support zero-tolerance.

Genealogy (from Greek: γενεαλογία genealogia from γενεά genea, "generation" and λόγος logos, "knowledge") is the study of families, family history, and the tracing of their lineages. Genealogists use oral interviews, historical records, genetic analysis, and other records to obtain information about a family and to demonstrate kinship and pedigrees of its members.
