19 Ways to Heal Systemic Lupus Naturally - DrJockers.com

Introduction. Systemic lupus erythematosus is a multisystem, chronic autoimmune disease characterised by the presence of antibodies directed at self-antigens, and broad immune dysregulation. 1 It is believed that abnormalities of both the innate and adaptive arms of the immune system, interconnected by a positive feedback loop, contribute to disease pathogenesis. 2

x Eruptive squamous atypia (ESA), which is an idiopathic, sometimes koebnerizing, proliferation of atypical but well-differentiated keratinocytes (also termed eruptive keratoacanthoma), is often misdiagnosed as cancer and managed by excisional surgery, provoking further koebnerization. A clear definition of this phenomenon and treatment outcome data are lacking.
