Cancer is a group of diseases involving abnormal cell growth with the potential to invade or spread to other parts of the body. These contrast with benign tumors, which do not spread. Possible signs and symptoms include a lump, abnormal bleeding, prolonged cough, unexplained weight loss and a change in bowel movements. While these symptoms may indicate cancer, they can also have other causes.

Various fringe theories have arisen to speculate about purported alternative origins for the human immunodeficiency virus (HIV) and the acquired immunodeficiency syndrome (AIDS), with claims ranging from it being due to accidental exposure to supposedly purposeful acts. Several inquiries and investigations have been carried out as a result, and each of these theories has consequently been ...

Let's take an in-depth look at the three types of hearing loss along with the causes and treatments: Conductive Hearing Loss. Conductive hearing loss is due to problems with the ear canal, ear drum, or middle ear and its little bones (the malleus, incus, and stapes).

### **Types, Causes and Treatments of Hearing Loss - the Basics**

Targeted prevention activities might include providing support to at-risk children and youth through mentoring and social skills instruction. Secondary prevention strategies are aimed at providing extra protection for those individuals who are exposed to multiple risk factors related to antisocial and violent behavior (Guetzloe, 1999).
