After nearly three decades, however, there is still much controversy and, surprisingly, not much empirical evidence to either support or discredit this data-driven approach to crime prevention. Nevertheless, agencies that have implemented intelligence-led policing have reported compelling results. So, where does intelligent policing stand today?

History. Prior to intelligence-led policing, a responsive strategy was the main method of policing. However, as crime was perceived to outgrow police resources in the UK, [when?] there was a demand gap, and a call [by whom?] for a new strategy that would more efficiently use the resources available at the time. Early development of intelligence-led policing took place in the UK.

## **Intelligence-led policing - Wikipedia**

"Intelligence-led policing emphasizes analysis and intelligence as pivotal to an objective, decision-making framework that prioritizes crime hot spots, repeat victims, prolific offenders and criminal groups.
